Case Number: 2099801393 Entered On: 10/26/2020 7:39:35 PM
Subject: 35001/Possession/GASAWAY/MANIACI/Pullum Entered By: Grzechowski, Jesse

Narrative:

PREDICATION

On October 24, 2020 at approximately 11:00 PM I received a call from Conservation Officer Casey Pullum asking for assistance with a search warrant at a residence in Mio Michigan. The search warrant was for a residence believed to be a site for the manufacturing of methamphetamines.

OFFICER ACTIONS/OBSERVATIONS

On October 25, 2020 at approximately 12:00 AM I arrived at the Oscoda County Sheriffs Office and met with all officers involved in the search warrant. A full briefing was given for the search warrant which was being executed to search for a multitude of evidence to include the manufacturing of methamphetamines. At approximately 1:10 AM Conservation Officers Casey Pullum and Brad Bellville, myself and two Oscoda County Sheriff's Deputies arrived and made entry into the residence. The residence was secured after arresting an occupant with felony warrants out of Iosco county. I was assigned to search and photograph evidence with Conservation Officer Brad Bellville. After securing the residence, I filmed the entire residence and out buildings before we began to search.

Conservation Officer Brad Bellville and I secured and searched the garage and did not find any evidence. While walking back to the house Conservation Officer Brad Bellville and I looked around the fire pit in the back yard. We located an empty canister of Coleman fuel, empty packages of Claratin-D, coffee filters and Energizer lithium batteries that had been cut open. We also found multiple bottles of Mountain Dew and Powerade with a white substance in the bottles, several bottles were melted, and one was smoking. I Photographed all materials then continued into the house to search one of the bedrooms. In the middle bedroom Conservation Officer Brad Bellville and I located a multitude of drug paraphernalia in the nightstand drawers. The drug paraphernalia included many different styles of glass pipes, a box containing a white powdery substance, a small mirror with razor blades and a tin containing a coffee filter. Each item was photographed and brought to a central location in the house for documentation. A search of the upstairs bedrooms did not locate any evidence. Conservation Officer Brad Bellville, Casey Pullum and I searched the front bedroom and located several more pipes, an Energizer lithium battery that had an end pried open and a cup containing several hypodermic needles.

Two members of a specialized drug team arrived on scene to dispose of the hazardous material located in the fire pit. Before leaving I filmed the entire residence. At approximately 5:00 AM the house was resecured and all law enforcement personnel cleared the scene.
